WHAT IS **MBZCOIN**?

Experience the Next-Generation Crypto Exchange with Mbzcoin! Trade, Invest, and Soar ..Your Gateway to Expanding Crypto Horizons: Trade with Confidence, mbzcoin Stake

Mbzcoin (MBZ) was initially launched on 2024-02-23 06:44:06 and tokenized the idea with BEP-20 tokens on the Business Smart Chain. We have made many benchmarks during the period of around one and a half years and then decided that we will migrate the tokens into a new contract to create a more robust, scalable, and investor friendly project. We have not done any presale, seed sale, or ICO till date. During the past one and a half years we were building an ecosystem which revolves around blockchain technology and a modern financial system based on crypto assets

WHY MBZ COIN ?

In the case of liquid staking, the competitors are well-known providers like centralized exchanges and other decentralized protocols like Rocket Pool.

The Mbz coin is the logical compromise between full centralization and decentralization, which allows the deployment of competitive products without full centralization and custody on the exchanges

A Mbzcoin is an optimal structure for launching Mbzcoin because

- Mbzcoin is highly dependent on the design and restrictions of the beacon chain
- BNB 2.0 staking protocol may change and therefore mbzcoin should be upgradable;
- An insurance provider must be selected and terms for slashing insurance must be negotiated;
- An insurance provider must be selected and terms for slashing insurance must be negotiated;
- Mbzcoin will be able to cover the costs of developing and upgrading the protocol from the Mbzcoin token treasury.

Problem Statement

Lower opportunities for returns over investment

Crypto assets are highly volatile in nature, and as of now there are thousand of platforms available in the industry but they focus only on trading of crypto currencies but trading is not easy to understand for small investors so they start depending upon several influencers, social-media trends, and other sources like friends and relatives for their trading (buy/sell) decisions and sometimes it creates a lavish ground for scams also. Thus, for mass adoption it is required to create more opportunities for investing in crypto so that investors can easily and freely earn good returns over investment

On the Mbzcoin (MBZ) platform, we have introduced unique products which allow users to invest with ease and get returns.

WHAT IS CRYPTOCURRENCY?

Cryptocurrency, refers to digital or virtual currencies that use cryptography for secure financial transactions, control the creation of new units, and verify the transfer of assets. Unlike traditional fiat currencies issued by governments, cryptocurrencies are decentralized and operate on a technology called blockchain. Cryptocurrencies have gained significant attention and popularity due to their potential for decentralized and borderless transactions, the ability to bypass traditional financial intermediaries, and the possibility of investment opportunities.

What is **AI**

AI represents a transformative technology that is reshaping our world. With its ability to process vast amounts of data, learn from experience, and adapt in real-time, AI is poised to drive significant advancements across various domains, ultimately improving our lives and pushing the boundaries of what machines can achieve. It encompasses a wide range of techniques, algorithms, and methodologies that enable machines to perceive, reason, learn, and make decisions in a manner similar to human intelligence.

AI + MBZ COIN COMBINATION

The combination of artificial intelligence (AI) and cryptocurrency has the potential to revolutionize various aspects of our society.

- RANGING FROM**
- ✦ : FINANCE**
- ✦ IMPROVED FRAUD DETECTION**
- ✦ CYBERSECURITY**
- ✦ DECENTRALIZED AUTONOMOUS ORGANIZATIONS (DAOS)**
- ✦ SECURE IDENTITY MANAGEMENT**

▶ As with any emerging field, responsible development and deployment of AI and crypto solutions are crucial to harnessing their benefits while mitigating potential risks.

WHAT IS SMART CONTRACT?

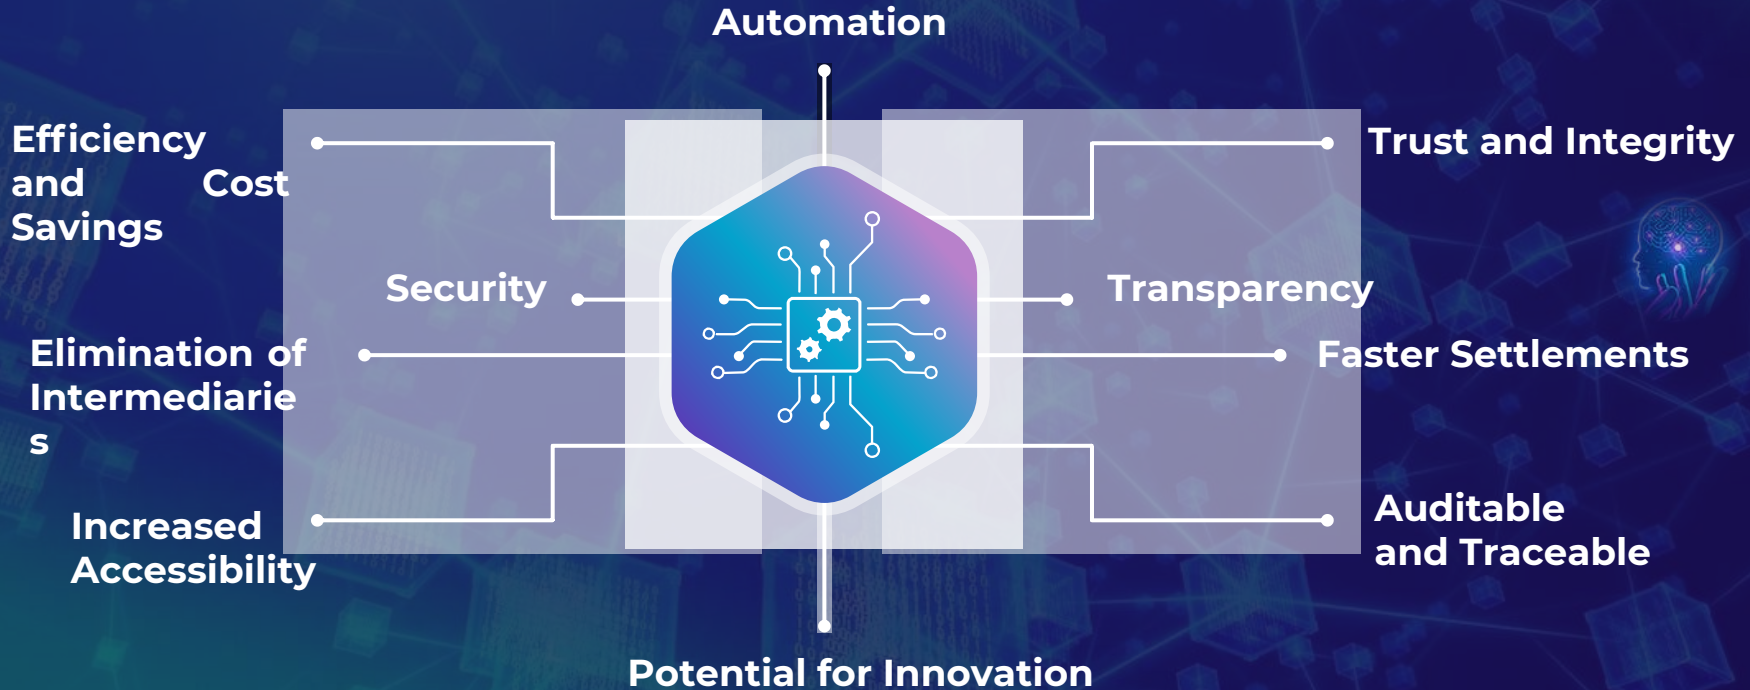

A smart contract is a self-executing contract with the terms of the agreement directly written into code. It is built on a blockchain platform, typically utilizing decentralized technologies such as Ethereum, Binance, Polygon and others. The code of the smart contract defines the rules and conditions that govern the agreement between parties, and it automatically executes those terms once the predefined conditions are met. Smart contracts are designed to facilitate, verify, and enforce the negotiation or performance of a contract, eliminating the need for intermediaries or trusted third parties. They operate based on a set of predefined rules and cannot be altered once deployed, ensuring transparency and immutability. Their decentralized nature and transparency make them an attractive solution for establishing trust and efficiency in various industries.

KEY FEATURES OF MBZCOIN

Mbzcoin is an AI-based cryptocurrency platform that integrates artificial intelligence and blockchain technology to provide unique features and functionalities.

Here are some key features of MBZCOIN

System Architecture

The Mbzcoin to ensure its efficiency and stability. Besides technical development, the Mbzcoin mandate is to promote Mbzcoin and recruit new users, node operators, and validators with educational content, promotional campaigns, and affiliate marketing

The Mbzcoin should do the following

- **Launch Mbzcoin**
- **Deploy protocol Mbzcoin smart contracts;**
Burn Transfer , Transfer From, Total supply and more functions other protocol parameters;
- Select the threshold signature scheme participants among reputable individuals or organizations willing to provide the service;
- Facilitate the multi-party computation ceremony to create the threshold signature account for staking rewards;

Risks

16

1. Smart contract security

The security of Mbzcoin must be the Mbzcoin ,highest priority beginning at the time of its deployment. Users should investigate risks involved with Mbzcoin before engaging with it. There is an inherent risk that Mbzcoin could contain vulnerabilities or bugs causing, among other things, the complete failure of Mbzcoin and/or its parts.

2. Binance chain technical risk

Mbzcoin on Binance is built on top of experimental technology under active development. There is no guarantee that the beacon chain network would be error-free or have a minimum uptime. Failures in Binance might lead to validators slashing and result in a significant drop in the balance and price of the stake Mbzcoin.

3. ST Mbzcoin price risk

Besides the risk associated with validators' slashing and a st mbz coin token balance drop, there is a chance that the exchange price of st Mbzcoin will be less than fair price for a while. In the beginning, there is no withdrawal feature in . As a result, arbitrage and risk-free market-making are impossible

Conclusion

17

We are in the middle of a big transition from the proof of work to the proof of stake consensus model. Security of the network depends on the amount of the total staked ether and the level of validators' decentralization — how many the network would have and how big they would be. As withdrawals are not available on the beacon chain, there is a risk that some users would not be able to afford self-staking. Because of that, users would either use some sort of exchange staking or pass on the staking altogether.

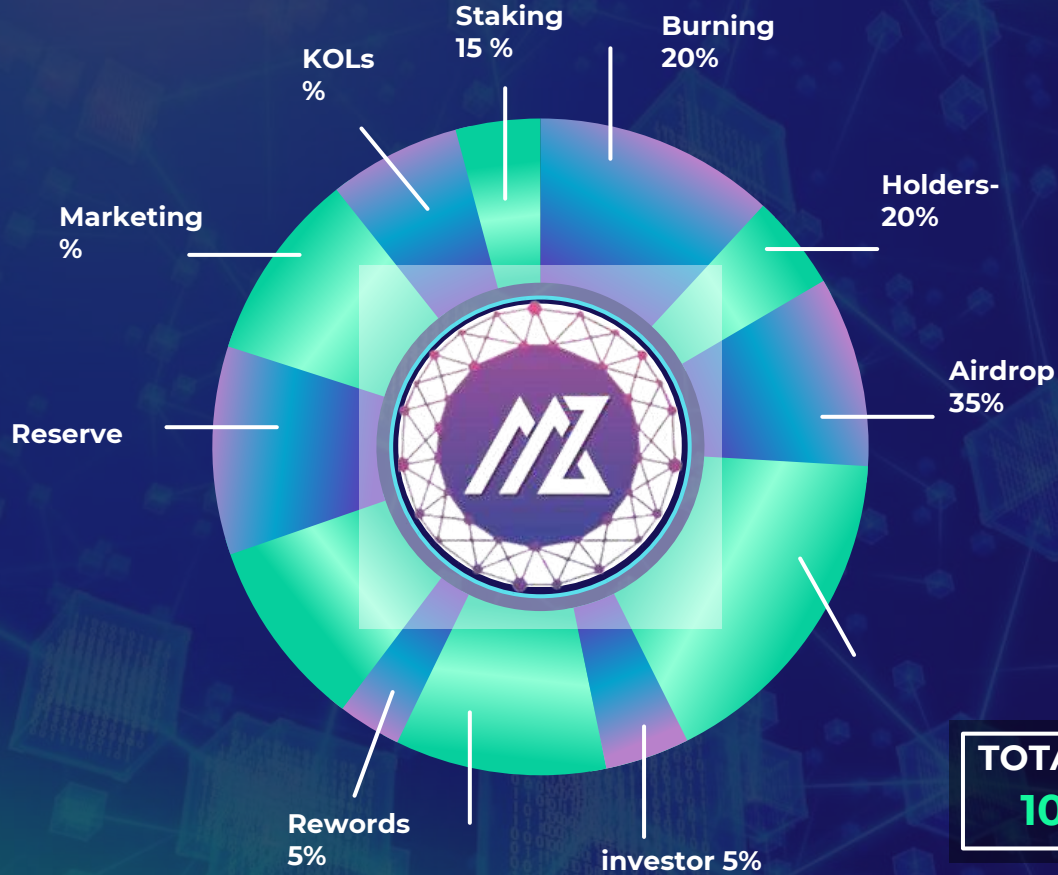

Limitations of the beacon chain affect the liquidity of staked capital for exchanges. We expect that most exchanges would not be able to offer rewards comparable to self-staking. The other thing to look out for is the high risk of network centralization. Exchanges are historically among the biggest ether holders, and they could become even bigger due to exchange staking.

Liquid staking provides a viable alternative to both self and exchange staking. Mbzcoin provides a balance of risk, reward, and convenience. It allows users to trade staked ether without a negative impact on the Mbzcoin network's decentralized nature.

TOKENOMICS

18

TOTAL SUPPLY TOKENS
100000000 MBZ

Team

We have a solid team under the leadership of our CEO and Founder,

His mission is to bring the non-mainstream population of India under the umbrella of financial literacy, enabling them to have confidence in managing their finances. With his leadership and dedication, Mbzcoin is set to change the financial landscape of India.

MBZCOIN

CEO & Founder

GOALS

20

Mbzcint aims to allow users to stake ether without losing the ability to trade or otherwise use their tokens. Mbzcint will be a decentralized infrastructure for issuing a liquid token that is safer than exchange staking and has incredible flexibility compared to self-staking

The primary goals of Mbz Coin

- To allow users to earn staking rewards without fully locking their Mbz Coin;
- To make it possible to earn rewards on as small a deposit as users want without restriction on deposits different .
- To reduce the risks of losing a staked deposit due to software failures or malicious third-parties ;
- To provide the stake Mbzcint token as a building block for other applications and protocols (e.g., as collateral in lending or other trading solutions)

MBZ COIN Platform

21

Crypto Trading

MBZ COIN allows users to buy or sell any listed crypto asset in one click instead of placing a market or limit order and waiting for the counter order to match like on many other available platforms. Although we also aim to launch our spot trading module but with a different core concept, which will be presented later in the near future. Our platform works in the aggregator form where we place the order volume to other exchanges to maintain liquidity. We allow users to buy and sell crypto assets with an USDT pair.

MBLAZE COIN (MBZ)

22

We have issued Mbzcoin , which is the utility coin of the Mbzcoin platform. There is a strict limit of 100000000 Mbzcoin which will never increase. Mbzcoinnatively runs on the Mbzcoin Smart Chain using the BEP-20 token standard

Mbzcoin smart contract: Address:

0x97029fd85AEE5A2Df6Eb9Aaa3ebe85997C386642

<https://bscscan.com/address/0x97029fd85AEE5A2Df6Eb9Aaa3ebe85997C386642#code>

As we mentioned over the introduction part we have launched on 2024-02-23 06:44:06 The initial max supply was 100000000 ,for robustness and scalability we have migrated the old contract in 0.8:4 ratio to the new contract.

Rewards & Referrals

We have introduced various reward systems on the mbzcoin platform for our users. The rewards and referral structure of the mbzcoin platform are:

Rewards: Engaging with Mbzcoin's offers an additional advantage to Mbzcoin holders, as they can receive rewards for their active participation.

Referral Program: Through the platform's referral program, users have the opportunity to earn Mbzcoin Coins by successfully referring new users to join the platform.

Revenue Model

Mbzcoin will generate revenue from the following sources:
